Open PhD/PostDoc positions at the Karlsruhe Institute of   Technology

we are looking for highly motivated candidates for multiple open PhD and/or PostDoc positions (full-time, non-tenured) in Computer Graphics and Scientific Visualization at the Karlsruhe Institute of Technology (http://cg.ivd.kit.edu/english/index.php).

Our research topics range from rendering (with a focus on physically-based rendering, both offline and realtime) to modeling and scientific visualization.

PhD candidates should have an interest in computer graphics/visualization, a solid mathematics background, and proficiency in C/C++. PostDocs will find a team of highly motivated co-workers and students to collaborate with. We provide an excellent working environment and equipment.

How to apply? Please email applications (and/or any questions) to Carsten Dachsbacher (dachsbacher@kit.edu).

I would appreciate if you can forward this information to interested students and researchers!

Best,

Carsten
