

## New Computer Graphics Positions Opening (soon) at ISTI-CNR (Pisa) and Insubria University (Varese)

The Visual Computing Laboratory (ISTI-CNR) and prof. Marco Tarini of Insubria University have recently won National and European grants for 4 research projects:

- "DSurf: Scalable Computational Methods for 3D Printing Surfaces" (Italian funding scheme PRIN) on 3D printing technologies
- "EMOTIVE" (EC project H2020) on Virtual/Augmented Reality technologies for enriching the museum experience
- International Joint Laboratory - National Research Council of Italy (CNR) and Centre National de la Recherche Scientifique (CNRS), on 3D digitization
- "SmartCarePad" (Regional project on 3D printing for medicine)

Very soon, a few new positions will be opened to work with these two research groups.

We are looking for young and motivated researchers willing to work on 3D Computer Graphics (subtopics: 3D digitization, Visualization and Rendering, Geometry Processing and Digital Fabrication).

Eligible master-level candidates may also have the chance to earn a PhD title.

Calls will be announced soon on the web page of the Visual Computing Laboratory

(<http://vcg.isti.cnr.it/>).

**\*\* Stay tuned! \*\***

Please feel free to contact us for any clarifications:
