

Three R&D Internships at Moda Live

Moda Live Company : Deeptech company located in Paris offers accurate, cinema-quality, live video clothing fittings over the Internet, based on real morphology

Contact : Thiery Godin, thierry@modalive.fr

1) VFX rendering

Mission : You will develop augmented reality effects through algorithmic research and high-performance programming

Profile : Student in final year of engineering school or Master2, familiar with real-time graphics rendering processes and image processing techniques, video game engines and development in C++

2) Artificial intelligence - Machine learning

Mission : You will train neural networks to perform video analysis tasks such as light estimation and fabrics reverse modeling

Profile : Student in final year of engineering school or Master2, familiar with machine learning and the Python environment

3) 3D & image processing

Mission : You will develop reverse modeling processes for garments

Profile : Student in final year of engineering school or Master2, familiar with 3D tools, image processing and the Python environment
